

Cost Control & Security Solutions

Manage costs associated with your MFP while protecting your company assets.

KYOCERA Net Manager

Control sensitive documents and reduce printing costs.

CONTROL & SECURE YOUR DOCUMENT FLOW

KYOCERA Net Manager (KNM) is a server-based application designed to protect your confidential data, manage & control the overall output (copy/print/scan) and get detailed reports. Users can keep an overview of personal printing jobs with web browser. It greatly simplifies scanning processes as it automatically displays a set of personalized options.

BENEFITS

- Complete Solution for Printing Services: A universal tool providing all services related to Copy/ Print/ Scan in one package.
- Secure Printing Fleet: Only authorized person can get access to copy/print/scan, to prevent the leakage of confidential document.
- Accurate Cost Allocation: Charge specific to user, department or cost center on difference charging schemes with lots of variety of reports.
- Personalization: Remember the most often used settings and saves them as default settings when log in.
- Easy Installation & Management: Integration of a single unified system in an intuitive operation with minimal requirements for installation and system administration.

Authentication

Access devices in one step PIN, ID-Card or User Name and Password

Security

Secure printing, data encryption and Print & Follow™ ensure access by authorized people

Reporting

Detailed statistics report in real time or scheduled period

Scan-to-Me

Personal scanning profile upon login, implement with OCR (Optical Character Recognition) software*

Mobile Printing

Send email to KNM server for print, enter credential on device for printed documents

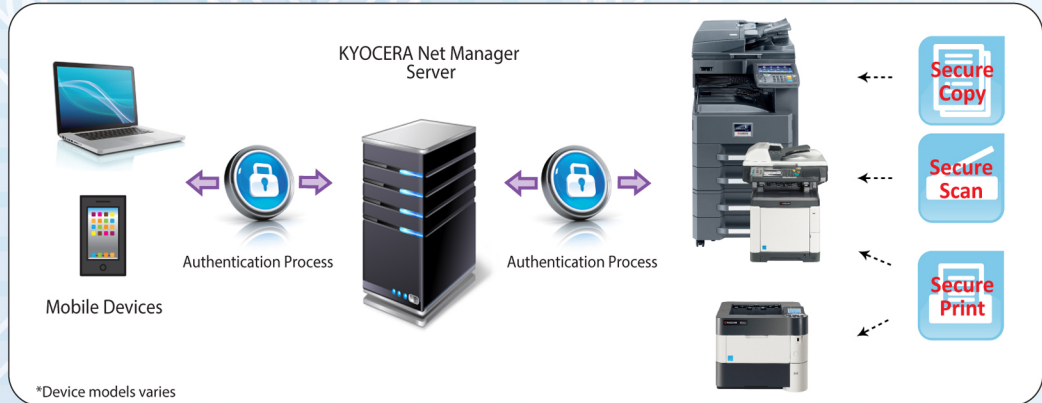

Quota or Credit

Quota can be set to each user or department or credit accounting for only users with prepaid credit

SOLUTIONS

HOW IT WORKS

1. User chooses the document to print and select PRINT of KNM universal print driver from any network computer or mobile device.
2. Print job is hosted at KNM server which is waiting for job release after authentication.
3. Tap ID-Card or input user name and password or PIN for user authentication. Select print job to be released from the MFP panel.

APPLICABLE TO

Medium Business/ Large Enterprise

Challenges: In a general office, a mixture of MFPs and printers in different brands causes headache when the device malfunctions. The administrator officer may also underestimate printing cost as it is hard to get the overall usage and expense on the printing devices. Other common complaints include the unattended documents being found on the tray or an unauthorized person may access to some sensitive documents.

Challenges: KYOCERA Net Manager is a comprehensive cost recovery solution that can track the printing volumes and expenses over different users, departments or projects of different printing devices, it offers detailed reports for monitoring. It also helps to facilitate a better control and reduce printing costs. Printing, copying and scanning can only be started after the user has logged in, documents can only be released to an authorized person.

SYSTEM REQUIREMENTS

Operating System: Windows® Server 2008/ 2008 R2/ 2012/ 2012 R2
Windows® Vista/ 7/ 8/ 8.1**

Memory: 2 GB or higher

Hard Disk: 300 MB free space (Exclude print jobs)

** For trouble-free operation, we strongly recommend a server operating system. Other operating systems may cause overflow of network sessions.
